FARM EXPENSES FOR TAXABLE YEAR (See Instructions)

1. ITEMS	2. AMOUNT	3. ITEMS (Continued)	4. AMOUNT (Continued)
Labor hired	\$	Other farm expenses (specify):	
Feed purchased	7500		\$
Seed, plants, and trees purchased	8400		
Machine hire	1100		
Supplies purchased	4000		
Cost of repairs and maintenance	10000		
Breeding fees			
Fertilizers and lime	15000		
Veterinary and medicine for livestock			
Gasoline, other fuel and oil for farm business	18000	72450	
Storage and warehousing		35	
Taxes	4100	76000	
Insurance on property (except your dwelling)	350		
Interest on farm notes and mortgages	3800		
Water rent, electricity, and telephone			
Rent of farm, part of farm, or pasturage			
Freight, yardage, express, and trucking	2000		
Automobile upkeep (farm share)			
TOTAL OF COLUMNS 2 AND 4 (enter on line 6 of summary on page 1 (cash basis) or line 7, page 2 (accrual basis).)			\$ 76250

DEPRECIATION (See Instructions)

1. Kind of property (if buildings, state material of which constructed)	2. Date acquired	3. Cost or other basis (do not include land or other nondepreciable property)	4. Assets fully depreciated in use at end of year	5. Depreciation allowed (or allowable) in prior years	6. Remaining cost or other basis to be recovered	7. Estimated life used in accumulating depreciation	8. Estimated remaining life from beginning of year	9. Depreciation allowable this year
2 Tenant Housing		\$ 50000	\$	\$ 7000		20		\$ 7500
2 Job Barn		50000		7000		20		2500
2 Cow Barn		70000		7000		20		2500
2 Smoke House		100		7000		20		500
TOTAL (enter on line 7 of summary on page 1 (cash basis) or line 8, page 2 (accrual basis).)								\$ 14000

REMARKS:

## METHOD OF ACCOUNTING

Farmers may compute their income either on the cash receipts and disbursements basis or the accrual basis, but whichever method is adopted must be followed until the consent of the Commissioner is received to compute the income upon a new basis.

## CASH RECEIPTS AND DISBURSEMENTS BASIS

A farmer reporting on the basis of cash receipts and disbursements shall include in his gross income for the taxable year (1) the amount of cash or the value of merchandise or other property received from the sale of livestock and products which were raised during the taxable year or prior years, (2) the profits from the sale of any livestock or other items which were purchased, and (3) gross income from all other sources. The farm expenses will be the actual amounts paid out during the taxable year.

## ACCRUAL BASIS

If your farm books of account are kept on the accrual basis, the filing of this form is optional.

For those reporting on the accrual basis, the gross profits are obtained by adding to the inventory value of livestock and products on hand at the end of the year the amount received from the sale of livestock and products, and miscellaneous receipts for hire of teams, machinery, and the like, during the year and deducting from this sum the inventory value of livestock and products on hand at the beginning of the year and the cost of livestock and products purchased during the year. The farm expenses will be the actual expense for the year, whether paid or not.

**Inventories of livestock raisers and other farmers.**—Farmers may change the basis of their returns from that of receipts and disbursements to that of an inventory basis provided adjustments are made in accordance with one of the two methods outlined in (1) and (2) below. It is optional with the taxpayer which method is used, but, having elected one method, the option so exercised will be binding upon the taxpayer for the year in which the election is made and for subsequent years unless another method be authorized by the Commissioner.

(1) Opening and closing inventories shall be used for the year in which the change is made. The opening inventory is the closing inventory of the preceding year (including livestock) purchased or raised which was on hand at the date of the inventory, and there must be submitted with the return for the current taxable year a statement showing the preceding year's closing inventory and the opening inventory upon the amount of which adjustment the tax shall be assessed and paid (if any be due) at the rate of tax in effect for that year. Ordinarily an adjustment sheet for the preceding year's closing inventory will be accepted in lieu of the opening inventory, but in his opinion, substantially reflect the income on the inventory basis for such preceding year or years; but inventories must not include real estate, buildings, permanent improvements, or any other property not included in the inventory method. (2) No adjustment sheets will be required, but the net income for the taxable year in which the change is made must be computed without deducting from the sum of the closing inventory and the sale of livestock and products the value of livestock, crops, and other products at the beginning of the year; provided, however—

(a) That if any livestock, grain, or other property on hand at the beginning of the taxable year has been purchased and the selling price exceeds the purchase price, the difference between the cost and the selling price should be reported as income for the year in which sold;

(b) But if the cost of such property has been charged to expense for a previous year, the amount so allowed must be reported as income for the year in which sold.

Because of the difficulty of ascertaining actual cost of livestock and other farm products, farmers who run their returns on the inventory method may elect to value their inventories according to the "farm-price method," which provides for the valuation of inventories at market price less direct cost of disposition. In this use of the "farm-price method" of valuing inventories for any taxable year involves a change in method of valuing inventories from that employed in prior years, permitting for such change shall first be secured from the Commissioner. In such case the opening inventory for the taxable year in which the change is made should be brought in at the same value as the closing inventory for the preceding taxable year. If such valuation of the opening inventory for the taxable year in which the change is made results in an abnormally large income for that year, there may be submitted with the return for such taxable year an adjustment sheet for the preceding year. This statement shall be based on the "farm-price method" of valuing inventories, upon the amount of which adjustments the tax, if any be due, shall be assessed and paid at the rate of tax in effect for such preceding year. If an adjustment for the preceding year is not, in the opinion of the Commissioner, sufficient clearly to reflect income, adjustment sheets for prior years may be accepted or required.

If returns have been made in which the taxable net income has been computed upon incomplete inventories, the abnormality should be corrected by submitting with the return for the current taxable year a statement for the preceding year's closing inventory and the opening inventory for the current taxable year. If necessary clearly to reflect income, similar adjustments may be made on growing crops, permanent year or crops, or, if the tax, if any be due, shall be assessed and paid at the rate of tax in effect for such year or years.

## INCOME

All the farm income from whatever source must be reported in this schedule. Anything of value received instead of cash must be treated as income to the extent of its market value. Thus, the market value of groceries, merchandise, or the like, received in exchange for butter, eggs, or other farm products, should be included in gross income. If hail and fire insurance on growing crops were included in gross income to the amount received in cash or the equivalent for the crop injured or destroyed.

A taxpayer electing to include in gross income amounts received during the year as loans from the Commodity Credit Corporation should file with his return a statement showing the details of such loans. (See section 122.)

If you sold your farm, or any part of it, fill in Schedule F (or Schedule G) on Form 1040 in accordance with the instructions thereon in bringing the net income from the sale of your farm produce which is consumed by the farmer and his family need not be reported as income; but expenses incurred in raising produce thus consumed must not be claimed as deductions.

Income from the farm includes the ordinarily accepted sense, and includes stock, dairy, poultry, fruit, and truck farms; also plantations, ranches, and all land used for farming operations. All individuals, partnerships, or corporations that own and operate a farm for profit are taxable as farmers, whether the owners are designated farmers. A person cultivating or operating a farm for recreation or pleasure, the result of which is a continual loss from year to year, is not regarded as a farmer.

## EXPENSES AND OTHER DEDUCTIONS

In general, a farmer who operates a farm for profit is entitled to deduct from gross income as necessary expenses all amounts actually expended in carrying on the business, including those which represent expenses which are deductible as a part of the classification of farm expenses is given on page 3 of this form. Any other equally descriptive classification may be used.

**Labor hired.**—Labor hired for regular farm labor, piece work, contract labor, and other forms of hired labor are deductible. Do not deduct the value of your own labor or that of your wife or dependent minor children, unless the amount deducted is reported as income on Form 1040. Only that part of the board which is furnished for hired labor should be included as a deduction. The value of products furnished by the farm and used in the board of hired labor is not deductible expense. Rations purchased and furnished to laborers or stock raisers are deductible as a part of the labor expense. Do not deduct amounts paid to persons engaged in household work, except to the extent that the services of such persons are used in boarding and otherwise caring for farm laborers. Services of such employees engaged in caring for the farmer's own household are not a deductible expense.

**Feed purchased.**—The cost of grain, hay, silage, mill feeds, and other concentrates and roughages purchased for farm animals, amounts paid for grinding, mixing, and processing of feed are also deductible.

**Machine hire.**—Amounts paid for threshing, combining, soil filling, blanking, ginning, and other machine hire are deductible.

**Supplies purchased.**—The cost of twine, spray material, poisons, disinfectant, cans, barrels, baskets, egg cases, bags, and other similar farm supplies purchased may be deducted as a farm expense.

**Cost of repairs and maintenance.**—Amounts expended for repairs and maintenance of farm buildings (except your dwelling), fences, drains, and other farm improvements, and for repairs and maintenance of farm machinery and equipment are deductible. Amounts expended for replacements of, or additions to, farm machinery, farm buildings, or other farm equipment of a permanent nature are not deductible. Amounts expended for the restoration of soil fertility preparatory to actual production of crops and the cost of liming soil to increase productiveness over a period of years are local expenditures.

**Taxes.**—State and local taxes are deductible. Do not deduct Federal income taxes, estate, inheritance, legacy, succession, and gift taxes; nor taxes assessed for any improvement or betterment tending to increase the value of the property assessed. Be ready to show receipts for taxes claimed as deductions. Expenses for item 14 on Form 1040. Taxes, such as those on retail sales, which apply to items sold in the farm business, may be considered as a part of the cost of the property.

**Fertilizers and lime.**—The cost of commercial fertilizers, lime, and manure purchased during the year, the benefit of which is of short duration, is deductible as an expense in the amount expended in the restoration of soil fertility preparatory to actual production of crops and the cost of liming soil to increase productiveness over a period of years are local expenditures.

**Interest.**—State and local taxes are deductible. Do not deduct Federal income taxes, estate, inheritance, legacy, succession, and gift taxes; nor taxes assessed for any improvement or betterment tending to increase the value of the property assessed. Be ready to show receipts for taxes claimed as deductions. Expenses for item 14 on Form 1040. Taxes, such as those on retail sales, which apply to items sold in the farm business, may be considered as a part of the cost of the property.

**Water rent, electricity, and telephone.**—Report only the farm share of these expenses.

**Rent of farm, part of farm, or pasturage.**—Rent paid in cash is deductible. Where a tenant farmer pays his rent to the landlord in the form of crops, the value of the crops is deductible as rent. Do not deduct as rent the value of the crop given to the landlord, but the tenant may deduct all amounts paid by him in raising the crop.

**Automobile upkeep.**—For automobiles used exclusively in farm business, all expenses of operation, repair, and depreciation may be deducted. For automobiles used both for farm business and for personal use, only that part of the expense corresponding to the business use may be deducted. If some items, such as gasoline or repairs, are included under other headings, include here only those expenses not shown elsewhere. The farm share of automobile depreciation should be entered in the depreciation table.

**Other farm expenses.**—Any expenditures, except those for capital investment, made in connection with the farm business and not shown elsewhere may be listed here under appropriate headings. Expenses for advertising farm products; expenditures for stamps, stationery, account books, and other office supplies purchased for farm use; expenditures for travel in connection with the farm business; and other similar miscellaneous expenditures are deductible. Amounts expended for purchase of automobiles, farm machinery, farm buildings, or other farm equipment of a permanent nature are not deductible expenses, as such expenses are deductible through depreciation allowances prorated over the useful life of the property.

**Depreciation.**—An allowance for depreciation of buildings, improvements, machinery, or other farm equipment of a permanent nature is deductible. The amount claimed on account of depreciation should not exceed the original cost (not replacement cost) of the property, or, if acquired prior to March 1, 1913, the cost or replacement cost of the property. Depreciation is taken care of in the reduced amount of the inventory at the close of the year. Depreciation, however, may be claimed on livestock acquired for work, breeding, or dairy purposes which are not included in your inventory of livestock purchased or raised for sale.

**Bad debts.**—Report only amounts which have been definitely proved within the year to be worthless, or such reasonable amount as has been added to a reserve for bad debts within the year. If you deduct from your income on the cash basis, bad debts arising within the year are not a deductible expense.

**Losses.**—You may deduct in Item 15 on Form 1040, losses of buildings, machinery, or other property not included in your inventory from fire, storm, or other causes, if the loss is covered by insurance or otherwise. Losses of property included in your inventory are taken care of by the reduced amount of the inventory at the close of the year. The value of a prospective crop by frost, or of animals raised by you and lost by theft, is not deductible, while in the case of animals purchased and lost by theft, the cost less depreciation allowed or allowable is deductible.
